Discussions on Health & Safety Progress

Bargaining Update #20 – September 27, 2017

At our 20th bargaining session, the parties continued the conversation about steps Kaiser can take to provide a safer, healthier workplace for nurses and patients. During this discussion, Kaiser presented a framework that outlined a commitment to ensure that nurses receive comprehensive health and safety training and can participate in facility health and safety committees. CNA views this is a positive step by Kaiser and will be looking at ways to fully develop a robust program that empowers nurses with the time and resources to improve health and safety, reduce workplace injuries, and curtail workplace violence.

Additionally, CNA made a counter proposal on the topic of the Regional Home Health and Hospice PPC.

We will continue to discuss outstanding proposals trying to reach agreement wherever possible. The next bargaining session will take place on Thursday, September 27.
